WEATHERMATE® – 38ETG

CENTRAL AIR CONDITIONING

HIGH EFFICIENCY, ENVIRONMENTALLY SOUND COOLING

COOL COMFORT AND SAVINGS FOR YOUR HOME AND YOUR FUTURE.

FUTURE IMPACT

Environmental concerns surrounding the Earth's ozone layer are affecting the future of your comfort. Governmental restrictions regarding the refrigerant used in most of today's home cooling systems mean that eventually, they will need to be replaced or updated. In an effort to provide you with the comfort you deserve now without the cost or effort to update your system later, Carrier offers the 38ETG air conditioner with Puron® refrigerant.

The 38ETG delivers the comfort you expect with Carrier reliability and money-saving efficiency. In 1996, we became the first company to offer an air conditioner using Puron refrigerant, and the results have been phenomenal. Puron-based air conditioners and heat pumps have become the most reliable products in our entire offering. The 38ETG continues that trend, offering the additional benefits associated with high, 13.0 SEER (Seasonal Energy Efficiency Ratio) cooling.

ECONOMY

The 38ETG can provide immediate money savings on your cooling bill while helping protect you against future costs as well. At 13.0 SEER, the 38ETG easily surpasses the efficiency ratings of older air conditioners and many new products as well. That type of efficiency translates into money-saving comfort that really shows when your electric bill arrives.

LASTING COMFORT

Carrier provides dependable cooling now and in the future with its durable construction and advanced reliability testing. Rugged, durable components made of brass, copper and aluminum provide the foundation for your comfort. During the design process, we heat test a full 10° higher than industry requirements. At assembly, every unit is run-tested to help ensure that these air conditioners are made to pass the toughest standards of all: yours.

TECHNOLOGY

ENERGY EFFICIENCY

1. **Scroll compressor** has been designed specifically for use with Puron refrigerant.
2. **Copper tube/aluminum fin coil** maximizes heat transfer needed for indoor cooling and resists corrosion for years of money-saving cooling.
3. **Puron® refrigerant** provides higher efficiency heat transfer than Freon®-22* for energy-saving indoor weather.

SUPERIOR RELIABILITY

4. **The scroll compressor** is designed with an extra-thick shell to protect the life of your compressor for excellent reliability.
5. **High and low pressure switches** protect the compressor from extreme conditions.
6. **Filter drier** removes moisture and contaminants that can harm your air conditioner.
7. **WeatherArmor™ grille** protects coil from debris 3/8" or larger, allows maximum airflow, easy coil inspection and cleaning, and provides lower maintenance costs.

The WeatherArmor™ grille protects your outdoor unit from yard and sporting equipment, rocks and other potentially damaging forces.

ENERGY STAR

As an ENERGY STAR® Partner, Carrier Corporation has determined that this product meets the ENERGY STAR® guidelines for energy efficiency.

WARRANTY

Carrier takes pride in offering the best indoor comfort equipment available. The 38ETG is covered by a **five-year parts limited warranty**. Ask your Carrier dealer about extended warranties.
